

The diagram illustrates a network architecture for a system. A central cloud labeled "internet 100" is connected to several components:

- Webmaster Server 120**: Two instances are shown, one on the left and one at the top left, each with a monitor and server tower.
- Ad Server 110**: Located at the top right, it includes a monitor, server tower, and is connected to two databases: **DB 112** and **Ref/PayoutDB 114**.
- List Server 140**: Located on the right, it includes a monitor and server tower, connected to **List DB 142**.
- Content Server 150**: Located at the bottom right, it includes a monitor and server tower.
- Subscriber device 130**: Three devices are shown at the bottom, connected to the internet cloud. They include a desktop PC, a laptop, and a tablet/PDA.
